Professional Summary

An enthusiastic and curious full-spectrum engineer with extensive experience building polished, native mobile applications. Specialist in **SwiftUI** and modern asynchronous architectures (**Combine, async/await**) with a proven track record in early-stage startups and AI-powered products. Expert at collaborating with backend and ML teams to translate complex intelligent automation into intuitive, high-performance user experiences.

Current & Recent Experience

Senior Developer | Floww Ltd.

Dates: May 2023 – September 2023

Keywords: `[iOS, SwiftUI, TCA, Redux, GitHub Actions, CI/CD, Mentoring, Shell Scripting]`

- Developed complex investment platform features using **SwiftUI** and the Redux-like Composable Architecture (TCA) for high reliability.
- Maintained CI/CD pipelines via GitHub Actions and custom shell scripting to ensure fast and reliable production releases.
- Improved application performance, responsiveness, and reliability through app startup monitoring and project restructuring.
- Collaborated across disciplines, assisting in web/API debugging and source archaeology for Angular frontend components.
- Promoted best practices and mentored junior engineering team members in modern iOS development and code quality.

Lead Mobile Developer | This One Ltd.

Dates: May 2022 – May 2023

Keywords: `[SwiftUI, Combine, Async/Await, Python, Flask, Fastlane, GCP, Firebase, ML]`

- **Founding mobile developer and iOS lead** for an ML-based Movie Recommender system, defining how intelligent software feels on modern mobile devices.
- Led greenfield-to-seed-round development using **SwiftUI, Combine, and async/await** architecture for real-time interactions.
- Partnered with ML and backend engineers to build scalable **AI-powered features** and prototype intelligent workflows.
- Managed automated deployment pipelines via Fastlane and Firebase, ensuring a polished product was shipped to real customers.
- Built Python-based mock servers and microservice backends to design schemas and test AI integration feasibility.

Senior iOS Developer | Sky

Dates: October 2021 – April 2022
Keywords: `[Swift, Kotlin Multiplatform, SwiftUI, Video Streaming, Analytics, Agile]`

- Served as Senior Developer on the Core Video SDK team, ensuring **high performance and reliability** for 25 million+ customers.
- Rewrote internal reference applications in **SwiftUI** to showcase modern mobile experiences and responsive UI patterns.
- Integrated complex analytics and video streaming technologies, focusing on handling latency and partial failures gracefully.
- Maintained a hybrid Swift and **Kotlin Multiplatform Mobile (KMM)** SDK used daily in a high-scale production environment.

Senior Developer | Living Map Ltd.

Dates: June 2020 – September 2021
Keywords: `[iOS, Mapping SDK, XCFrameworks, CocoaPods, Carthage, Background Location, UX]`

- Senior developer for flagship iOS Mapping SDKs, focusing on **usability, performance, and product quality**.
- Re-architected the SDK to handle background location and offline caching, ensuring a resilient user experience during partial failures.
- Reduced business risk by automating legacy deployment procedures into a single, reliable 10-minute command.
- Provided autonomous technical leadership and customer liaison to ensure seamless integration into complex applications.

Senior Apple Engineer | Bugsnag Inc.

Dates: January 2020 – June 2020
Keywords: `[Objective-C, C++, iOS, macOS, watchOS, tvOS, Open Source, Crash Reporting]`

- Specialized in **application reliability and performance** for enterprise-scale clients including Netflix, Airbnb, and Apple.
- Maintained open-source Apple ecosystem libraries, ensuring high standards of code quality and robust error handling.
- Provided expert-level support for crash log analysis and root cause isolation in complex multi-platform environments.
- Managed packaging and distribution across Swift Package Manager (SPM) and CocoaPods for high-calibre engineering teams.

Principal iOS Developer | Amiosec Ltd. (Contract)

Dates: March 2019 – December 2019
Keywords: `[Xamarin, Visual Studio, C#, Objective-C/Swift Interop, EWS, ReactiveUI, Security]`

- Architected and implemented a **Reactive MVVM** pattern to ensure highly responsive and intuitive user interfaces.
- Built complex cross-language interoperability between C# and Swift/Objective-C to leverage native mobile capabilities.
- Reverse-engineered backend services to build scalable product features and resilient data handling for secure environments.

Principal iOS Developer | Dyson Ltd. (Contract)

Dates: June 2017 – January 2020
Keywords: `[iOS, Greenfield, Enterprise MDM, ARKit, RealmDB, Swift, Unit Testing]`

- **Sole developer** for a greenfield B2B iPad application, delivering a production-ready product autonomously in 8 weeks.
- Integrated emerging technologies like **ARKit** to build innovative and intelligent mobile product experiences.
- Achieved **>80% Unit and UI Test coverage**, ensuring high product quality and reliability for worldwide staff.
- Managed end-to-end integration with enterprise MDM and penetration testing, demonstrating technical direction and ownership.

Earlier Experience (Summary View)

Head of Mobile Development | Actual Experience Ltd.

Dates: March 2014 – June 2017
Summary: Led mobile engineering for a greenfield network analytics dashboard; focused on low-level networking performance and refactoring legacy code to modern Swift patterns.

Principal Mobile Developer | Accident Exchange Group (Contract)

Dates: May 2013 – March 2014
Summary: Developed greenfield consumer iOS app for vehicle telemetry, focusing on reliable CoreLocation and MapKit integrations.

Senior Middleware & DevOps Developer | MySpace

Dates: March 2012 – May 2013
Summary: Java/Python middleware development and DevOps; developed early second-screen IPTV features for iOS (Objective-C).

Open Source & Key Projects

- **Coding Exercises:** Interview algorithms & solutions (GitHub).
- **React Native Input Spinner:** Open-source contributor to modern mobile UI components.

- **Bricksmith:** Award-winning LEGO CAD software for macOS (Objective-C).
- **Pycel / Excel Formula Parser:** Python-based dependency graph and formula parser.

Education, Certifications & Governance

- **BSc (Hons) Artificial Intelligence and Computer Science** — University of Edinburgh
- **Certified Scrum Master (CSM)**
- **Parent Governor** — Wyedean Academy (Advising on IT infrastructure and governance).
